Tolmerra Water Authority

Catchment Health Monitoring Report 2025

Technical report, 2025

41 Quarry Street, Wattleford | 1800 975 707 | tolmerrawater.example

This report summarises catchment health monitoring from 2015 to 2025. We monitor 28 sites for water chemistry, macroinvertebrates, native fish and riparian vegetation.

Stream condition has improved at 19 sites since 2015, mostly where fencing and revegetation projects were completed.

Sediment loads to Mount Orrin Reservoir have fallen by an estimated 30 per cent since the Sedgewick Wetlands restoration.
