Tolmerra Water Authority

Drought Plan 2025-30

Strategy and plan, 2025

41 Quarry Street, Wattleford | 1800 975 707 | tolmerrawater.example

The drought plan sets out how the Authority will secure supply during dry conditions. It describes four restriction stages and the storage trigger levels that start each one.

Stage 1 is a voluntary water-saving reminder. Stages 2 to 4 apply progressively stricter limits on outdoor use.

The plan commits the Authority to publish storage levels weekly, to contact rural customers directly during stage 3 and to review the plan every five years.

Customers with medical needs, community gardens and commercial growers can apply for an exemption under the plan.
